EDMEALEM KASSAHUN

Software Engineer | Backend-Focused Full-Stack Developer | TypeScript & Node.js

Bahir Dar, Ethiopia | +251 908 005 801 | edmealemkassahun@gmail.com | linkedin.com/in/edmealem-k | github.com/edmealem-k | wakatime.com/@edmealem

PROFESSIONAL SUMMARY

Backend-focused software engineer and full-stack TypeScript developer with 3+ years of hands-on experience building production web applications, backend services, REST APIs, dashboards, and real-time features. Strong in Node.js, NestJS, Express.js, Next.js, PostgreSQL, MySQL, MongoDB, and modern ORMs, with professional experience across SaaS, edtech, ecommerce, and execution-governance products. Comfortable taking features from requirements through implementation, testing, deployment, and production support.

TECHNICAL SKILLS

Backend & APIs: TypeScript, JavaScript, Node.js, NestJS, Express.js, Next.js API routes, REST APIs, authentication/authorization, RBAC, cron jobs, Socket.io/WebSockets, real-time systems

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma, TypeORM, Sequelize, Mongoose, SQL, schema design, relational data modeling

Frontend: React, Next.js, Tailwind CSS, responsive UI, React Hook Form, Redux Toolkit

Cloud, DevOps & Tooling: AWS (EC2, RDS, S3, SES, Route 53), Docker, Linux, Git/GitHub, CI/CD, Swagger/OpenAPI, Postman, Vercel, Render

Currently Building & Learning: Go (Golang), Gin, GORM, Redis, RabbitMQ, Hono, Bun, Drizzle ORM, BullMQ, background jobs, caching, message queues, system design, microservices, distributed systems, Terraform

PROFESSIONAL EXPERIENCE

Nexudy — Nov 2025 - Present

Software Engineer — *Seattle, WA, United States - Remote*

- Build and maintain full-stack product features for an execution-governance platform used to align leadership, oversight, and delivery teams around verified execution.
- Develop backend services and responsive frontend workflows using TypeScript, Next.js, Node.js/NestJS, and PostgreSQL, with attention to reliable APIs, clean data models, and maintainable architecture.
- Collaborate across product and engineering to turn execution-risk and evidence-tracking requirements into production-ready software, supported by testing and CI/CD practices.

Askuala Link PLC — Mar 2025 - Oct 2025

Backend Developer — *Bahir Dar, Ethiopia - Hybrid / Remote*

- Contributed to an AI-powered school management and communication platform serving students, parents, teachers, and administrators.
- Implemented authentication and authorization flows, message broadcasting, grading and ranking systems, annual result/roster generation, and inventory/procurement features.
- Built and maintained REST APIs and real-time communication features with Node.js, Express.js, MySQL, Sequelize, and Socket.io while improving reliability of existing modules.

Nexus Tech Solutions — Nov 2024 - Feb 2025

Full-Stack Developer Intern — *Addis Ababa, Ethiopia - Remote*

- Developed a student-management admin dashboard for a beauty school, enabling enrollment tracking, course-based payments, and daily transaction review.
- Implemented backend payment tracking, overdue-payment reminders with node-cron, SMS confirmations, and programmatic/manual notifications through Afro Message integration.
- Moved quickly from frontend work into backend development and delivered features with minimal supervision and strong attention to implementation quality.

SELECTED PROJECTS

Execution Governance Platform | *Nexudy*

- Developed full-stack workflows for an execution-governance platform that helps institutions verify progress with evidence, detect risk early, and maintain a single source of truth.
  Stack: Next.js, TypeScript, Node.js/NestJS, PostgreSQL

Multi-Vendor Ecommerce Marketplace | *GreenBasket*

- Built a multi-vendor marketplace with admin/vendor dashboards, vendor verification, inventory, orders, real-time notifications, secure authentication, and Chapa payment integration.
  Stack: NestJS, Prisma, PostgreSQL, Next.js, React, Tailwind CSS, Redux Toolkit, Swagger

AI-Powered SMS for African Schools | *Askuala Link*

- Contributed backend features, reporting workflows, automation, and real-time messaging for a school management and communication platform tailored for African schools.
  Stack: Node.js, Express.js, MySQL, Sequelize, Socket.io

Hotel Room Reservation Platform | *Personal Project*

- Built a full-stack hotel booking system with authentication, file uploads, payment integration, role-based admin/manager dashboards, booking management, and responsive customer flows.
  Stack: TypeScript, React, Next.js, Node.js, Express.js, MongoDB, Chapa, Cloudinary

Books Tera | *Personal Project*

- Built real-time chat functionality for a social platform connecting local book lovers and integrated the backend communication flow with a React frontend.
  Stack: NestJS, Socket.io, React

EDUCATION

Bahir Dar University **Jun 2021 - Jun 2025**

Bachelor of Science in Software Engineering

- GPA: 3.86/4.00
- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Web Development

CERTIFICATIONS

- Back End Development and APIs - freeCodeCamp
- Responsive Web Design - freeCodeCamp
- Programming Fundamentals - Udacity

PROFESSIONAL DEVELOPMENT

Currently strengthening backend and systems engineering skills through hands-on study and personal projects focused on Go, HTTP services, Redis, RabbitMQ, job queues, caching, message-driven architecture, system design, distributed systems, and infrastructure as code with Terraform.

Open to backend-focused and full-stack software engineering opportunities.
